Experience

Co-Founder and Lead Programmer at ThnkDev **2011-Present**

Co-Founder and programmer for an app development startup. We primarily focus on creating mac apps including the popular QuickRes, Screenie, and Snapped for Mac.

Software Development Engineer Intern at Airbnb **Summer 2016**

Leading development of engagement and virality projects for the Airbnb iOS and watchOS apps as part of the mobile growth team.

Software Development Engineer Intern at Apple **Summer 2015**

Creating an innovative new product to provide deeper integration and user engagement to a first party iOS App.

Independent Study Virtual Reality Rock Climbing **Spring 2015**

Prototyped an immersive virtual reality rock climbing wall as part of a research project with Professor Schulze. <http://rockclimbingvr.com>

Software Development Engineer at Yelp **Summer 2014-Winter 2015**

Worked on the Yelp Android app as a summer intern and a part-time engineer. I developed new contribution features and enhanced user experience, including a redesigned nearby page and improvements to photos.

Independent Study Creating Data Transfer Tool **Spring 2014-Fall 2014**

Building a UDT based tool to transfer large amounts of data over long distance and high-speed networks as part of a research project with Professor Papadopoulos.

Software Development Engineer Intern at Amazon Lab126 **Summer 2013**

Developed features for the Kindle Fire tablets as a member of the framework team, primarily modifying android source to improve and create new components.

Education

University of Southern California **2017-Present**

Currently attending USC for a masters degree in Computer Science.

University of California San Diego **2012-2016**

Graduated from University of California San Diego with a 3.98 GPA majoring in Computer Engineering.
